Criteria

1. Canvas – Used to create pool in the hero section of the home page and in creating the 'National Red Cross' (a fictional organization) logo.
2. Interactive Map – in locations.html
3. Interactive Data Visualization – Team Records chart and speed gauge
4. Modernizr – Used with canvas and SVG
5. JQuery effects – Page titles and Map information transitions
6. Video – video used in home page

Site Design

For the site design I decided that a simple and clean approach would be ideal. It's more modern than most aquatics program's sites that I have researched, and I think that many local swim clubs could likely do with a facelift for their site and branding.

I wanted strong colors along with the minimalist design to offset the white space. This helps to provide emphasis on important details.
